

WSSDA BoardDocs

The paperless governance solution for school boards

WSSDA is pleased to partner with Emerald Data Solutions to offer BoardDocs—a paperless meeting service developed for school boards to alleviate the enormous task of assembling, printing, distributing and revising agenda items and policies.

With BoardDocs you not only have the ability to process agenda items, supporting documents, policies and procedures, but you also determine who has access to each document—such as board members and staff, or the general public. Plus, you can make last minute revisions, and redistribute your materials—in mere minutes.

More and more school districts around the state are using BoardDocs because it offers a simple, effective means of preparing for and conducting board meetings. Specifically designed for the school board/superintendent leadership team, BoardDocs offers easy and efficient agenda review, document publication and meeting presentation. Additionally, BoardDocs helps foster better communication between the board and the public by providing easy access to public documents and the type of transparency that the public demands.

"Converting to BoardDocs was one of the best decisions we made as a board. The response has been great. Our staff and community love the transparency the system provides. The speed and agility of the system provides the board and the community with split-second updates and fast archive searches. I have not seen or used any system that is this good. Keep up the good work."
