

The Professional Educator Standards Board is proposing to change the standards by which they evaluate the effectiveness of teacher preparation programs. They have provided an opportunity for stakeholder input that can be accessed through the following link: <http://program.pesb.wa.gov/indicator>. WSSDA members are encouraged to review the proposal and send comments directly to the PESB. Note that several community meetings on the topic (both live and virtual) are scheduled over the next two weeks, and that the comment period ends August 14.
